

The AI platform for research development teams.

Win more proposals, with the team
you already have.

PRESENTED BY

Tomer du Sautoy, Atom Grants

DATE

June 2026

FOR

University of Iowa

The job of research development keeps growing. The team doesn't.

WHAT TEAMS ARE UP AGAINST

The squeeze is real.

Budgets are flat or shrinking, and the team isn't growing.

The workload keeps climbing: more faculty, more proposals, more compliance.

Less visibility into where funding is actually moving.

WHAT INSTITUTIONS ACTUALLY NEED

Outcomes. Submitted proposals. Awarded dollars.

More faculty reached, without more staff.

Stronger proposals, not just more of them.

02 / A DIFFERENT CATEGORY

Atom is a **teammate**, purpose-built for research development.

Not a search tool. Not a generic AI. Not a years-long internal project. A team of AI agents and research development experts, working alongside your staff on discovery, eligibility, collaborators, drafting, and review.

“Atom is taking the burden away from our pre-award unit because they’re guiding the PIs in the submission process.”

Lydia Perry

Grant Writer · UA at Little Rock

Atom runs your entire research development workflow. Your team is freed to do the work only they can do.

01

Automated Profiles

Living profiles of every researcher, tailored to their actual work.

02

Grant Discovery

Relevant opportunities surfaced and automatically distributed to the right faculty.

03

Eligibility Checks

Gate criteria verified before anything reaches a faculty inbox.

04**05****06**

Universities are using Atom to set submission records.

“This fiscal year we have set **records for submissions**, and I attribute that to the fact people are engaging with Atom.”

Brian Evans, PhD

Assistant Director · University of Memphis

600+

Faculty engaged across the university in one year.

10×

Lift in faculty engagement vs. prior platform.

Record

Year for proposal submissions at Memphis.

Trusted by 50+ research institutions, from R1 universities to specialized institutes.

NDSU NORTH DAKOTA
STATE UNIVERSITY

"It was about the low barrier to entry, quick implementation and low burden on faculty. That was a big deal for me. This is a no brainer."

Heidi Grunwald, PhD

AVP of Research · North Dakota State University

"I just saw our uptake numbers compared to the old system and we are seeing 3x engagement uptick already!"

Amanda Breeden, CRA

Associate Chief, Research · Denver Health

and 45+ more

Auburn, Kansas State, Franklin & Marshall, Middlebury, Slippery Rock, and dozens of research teams nationwide.

See where your institution stands.

Atom tracks every interaction and reports it back: agent activity, faculty engagement, pipeline health, and submission trends.

- Reviewed with your named team at each check-in.
- A shared data room for every report and deliverable.
- Spot funder priorities and momentum shifts early.
